# HIGHJUMP™ SUPPLY CHAIN ADVANTAGE INMOTION

## KEY BENEFITS

- Turns familiar consumer mobile devices into modern RF scanners
- Compatible with iOS, Android, Windows 10 devices
- Intuitive user experience designed for touchscreen
- Compatible with connected and integrated scanners
- Included with HighJump™ Supply Chain Advantage applications

Smartphones and tablets have become a fundamental part of our everyday lives. They make daily tasks far more convenient. Once time-consuming jobs can often be resolved with a few taps of the finger.

With the HighJump™ Supply Chain Advantage inMotion mobile application, you can now empower your warehouse associates with those same devices in the distribution center. HighJump Supply Chain Advantage inMotion is a scalable application that enables any smartphone or tablet with the capabilities of an RF scanner.

### MODERN, EASY-TO-USE INTERFACE

The HighJump SCA inMotion application is delivered via a clean, visually-appealing user interface. It's designed from the ground up to be delivered on touchscreen mobile devices, making for a seamless, intuitive user experience.

The mobile application's familiar look and feel make it easier to onboard employees, resulting in operational savings. Not only will it take your workforce less time to operate at full capacity, but employees can be more productive than ever before because they are already comfortable using these devices.

### EXTENSION OF YOUR WMS

HighJump SCA inMotion directs workflows with your HighJump warehouse management system (WMS) acting as the central nervous system of your operation. Any changes to the business processes within HighJump™ Supply Chain Advantage will be reflected in the mobile app's task direction.

The HighJump SCA inMotion mobile app is included with all of the HighJump Supply Chain Advantage solutions, such as HighJump™ Warehouse Advantage or HighJump™ Retail Advantage. It's just another way HighJump capitalizes on the latest technology to help your company stay agile and competitive.

### COMPLETE VERSATILITY

The beauty of a smartphone is that it's a powerful device with far-reaching capabilities. It can place a call, access the internet, provide visibility to people, processes and inventory across the warehouse, execute RF transactions and more. That functionality can help you improve customer service. For example, if an order is being fulfilled in-store but the requested product is out-of-stock, the associate can call the customer to see if there's a satisfactory substitution. If the client agrees to an alternative, it prevents a lost sale.

HighJump SCA inMotion is also compatible with connected scanners for consumer devices or integrated scanners for commercial devices. It can be paired with hands-free scanners that make directed put-away, picking and shipping processes much more efficient. These are major process and people improvements that could have a lasting positive impact on the bottom line.

### RUNS ON ALL MOBILE DEVICES

HighJump SCA inMotion can operate on iOS, Android and Windows 10 mobile operating systems with the scalability to run on every consumer-grade device – from a smartphone to a tablet. This provides businesses with the flexibility to run directed RF work activities on ruggedized mobile devices or have associates use their personal smartphones in the warehouse, a.k.a. BYOD (Bring Your Own Device). It's yet another way to cut costs.

The application can also run on commercial-grade mobile devices. If your business has already invested in commercial-grade smartphones or tablets from the likes of Panasonic or Honeywell, HighJump SCA inMotion will continue to help you meet strategic business goals.

### EXTENDED CAPABILITIES

HighJump SCA inMotion will soon offer these valuable features:
- Display pictures of products and locations to ensure pickers always pull the right product off the shelf and find it as quickly as possible.
- Toggle to a WMS browser session to display supporting documents or play videos that could provide instructions on the best way to execute a certain warehouse process (e.g., quality audits).
- Toggle to the HighJump™ Inspection app to collect quality-related data and capture digital images when necessary (for example, a picture showing damage to inbound product).

### THE HIGHJUMP TEAM IS HERE TO HELP!

If you have any questions regarding HighJump or how our products can improve your business, our passionate team is here for you.

### ABOUT HIGHJUMP

In almost every industry, buyers are becoming more fickle, and more demanding. For logistics executives, effectively meeting buyer needs has become a relentless quest for speed and agility. Traditional supply chain solutions – siloed, complex, and hard-to-implement – no longer suffice, as competitors find ways to deliver goods faster and more profitably.

In today's "now" economy, HighJump helps you stay agile, with adaptable, connected solutions that harness the power of your trading partner community. From the warehouse to the storefront, from the desktop to the driver's cab, we can help you achieve new levels of supply chain responsiveness, performance, and profitability.

HighJump's suite of warehouse management, business integration, transportation management, and retail/DSD solutions form a complete, powerful, and adaptable platform that allows you to drive growth, customer satisfaction, and revenue. **HighJump: supply chain accelerated.**
