IFS SMARTFREIGHT® EXPRESS

IFS SmartFreight® Express (SFX) - IFS Web-Hosted Solution

IFS web-hosted, minimal entry cost Transport Management System (TMS) for low volume shippers of freight or branch networks. Basic dispatch functionality, prints to a laser printer so no specialised label printer requirement or a thermal label option is also available. Freight data can be downloaded into Head Office SFP or SFE database for national reporting.

Product Fit

IFS SmartFreight® Express (SFX) is aimed at start-up companies, SME's, larger companies that have large branch network with lower volumes shipped per branch or online retail companies that wish to Drop Ship directly from supplier to end customer.

Simple to configure and operate, fully web-hosted by IFS on our Secure Data Bureau utilising multiple industrial servers and multiple Internet Service Providers for redundancy.

Can be linked back onto organisations Head Office IFS SmartFreight® to provide full visibility of freight across entire organization and facilitate centralized freight cost reconciliation and payment.

Key Attributes

- Compliant with domestic carriers in Australia, New Zealand, UK, Ireland and mainland Europe with new counties being added regularly.
- Prints to laser label so no specialised hardware required (thermal option available)
- Quick and easy configuration and installation including carriers freight rates
- Route optimisation deployed to ensure the most cost or service effective local carrier is selected for the type of goods being shipped
- Electronic data sent to carriers with zero formatting / development required by shipper.
- Web Service bi-directional interface available
- If utilised for branch networks or Drop Shipping by supplier, all data can be transmitted back to Head Office for freight invoice reconciliation or tracking DIFOT reporting purposes
- For full list of Modules available within Express see Modules Insert
.

"Delivering Transport Software Solutions"

Return on Investment

- Minimal setup cost
- No specialised hardware required
- 100% SaaS (Software As A Service) Model after system installed
- Route optimisation saves clients on average in excess of 25% of freight costs making IFS SmartFreight® one of the best investments our clients ever make
- Single bi-directional interface between ERP/WMS eliminates cost of writing and maintaining multiple interfaces to multiple transport companies
- Seamless upgrade to IFS SmartFreight® Professional if freight volume dictates
- For full financial impact and ROI see ROI Insert
