

HighJump Software Appoints Vice President of Corporate Development to Lead Worldwide Acquisition Efforts

Robert Martin will execute HighJump's merger and acquisition strategy to extend the HighJump product portfolio and meet broader customer and market technology requirements

EDEN PRAIRIE, Minn. (Dec. 10, 2009)--HighJump Software, a global provider of supply chain execution solutions, today announced the appointment of Robert Martin as Vice President of Corporate Development. Martin will lead HighJump Software's worldwide acquisition efforts.

Growth through acquisition is a critical component to HighJump's corporate strategy. In his role, Martin will be responsible for identifying acquisition candidates that align with HighJump Software's strategy, negotiating merger and acquisition transactions and ensuring acquired businesses are successfully integrated to meet strategic objectives.

"Our customers prefer to have supply chain solutions from a single technology partner. We will continue to utilize acquisitions to extend our product portfolio and satisfy a broader scope of our customer's technology requirements," said Timothy Campbell, President and CEO, HighJump Software. "Rob is the perfect leader to help us accomplish these objectives. He has a strong background of M&A experience and will be a valuable addition to the HighJump management team."

Martin was most recently a Principal at Cherry Tree & Associates, a boutique investment bank focused on M&A advisory. Prior to this role, he was at United Subcontractors where he led their acquisition strategy, completing 15 transactions that added over \$300M in revenue. Martin has also served as a sell-side equity research analyst at Craig-Hallum Capital where he covered the computer systems and data storage sectors, and as senior associate at PricewaterhouseCoopers.

"HighJump Software has exciting plans to continue to grow through acquisition, and I'm excited to be joining the company to help execute on that strategy," said Martin. "HighJump is unique in the supply chain software market with access to extensive financial resources and a long term view of strategic growth."
