

HighJump Software Appoints Gary Nemmers and Amy Stelling-Kahler to Executive Management Team

EDEN PRAIRIE, Minn. (May 19, 2010) – HighJump Software, a global provider of supply chain management software, has appointed Gary Nemmers to Vice President of Sales and Amy Stelling-Kahler to Vice President of Worldwide Support.

“Gary and Amy are valuable additions to the HighJump executive management team and bring extensive experience to their roles,” said Russell Fleischer, CEO, HighJump Software. “Amy has served in many key positions at HighJump that make her uniquely suited for this newly created executive position, and Gary has extensive sales leadership experience in the supply chain software industry.”

As Vice President of Sales, Nemmers is responsible for worldwide sales of HighJump solutions. Nemmers joined HighJump after managing the Americas direct sales organization for Infor Global Solutions. He joined Infor in 2006 with extensive experience on both the customer and vendor side of the supply chain software industry, including leading direct sales teams for SAP and Oracle Corporation. These roles included developing new sales channels for product sourcing as well as building several new sales “avenues to market” across the U.S., Canada and Europe. Nemmers also served as the CEO and managing partner for DataTrend Information Systems, where he helped grow the company from start-up to \$54M in annual revenue in just four years. After DataTrend, he became the VP of Sales for an Oracle services and VAR company.

“It is a great time to join the team at HighJump,” said Nemmers. “HighJump has a uniquely flexible supply chain product suite and a leadership position in the direct-to-store delivery (DSD) software market. These are key elements in driving additional sales growth.”

As Vice President of Worldwide Support, Stelling-Kahler is responsible for the HighJump Software Worldwide Support team across all products and locations. Since joining the company in 2002, Stelling-Kahler has held multiple technology leadership roles. Most recently, Stelling-Kahler was Director of Pre-Sales for HighJump Software, where she aligned prospective customer’s business requirements with HighJump’s suite of solutions. Previously, Stelling-Kahler held the role of Director of Worldwide Support and was a member of HighJump’s professional services group, where she implemented HighJump solutions across multiple industries on a global basis.

“The creation of an executive leadership role for customer support demonstrates HighJump’s continued commitment to customer service and knowledgeable technical support,” said Stelling-Kahler. “I look forward to leveraging our support processes, product expertise, and knowledge of customer operations to ensure our customers receive the highest level of support for their mission critical systems.”
